

February 2022 Highlights

- PrimeXM has registered a total of \$1.213 trillion in monthly trading volume in February 2022 across the four major Data Centres (LD4, NY4, TY3 and SG1), which a remarkable 33.32% YoY increase compared to last year’s \$909.89 billion and a 2.26% MoM growth vs January 2022
- The Average Daily Volume (ADV) in February increased MoM with 7.37% to \$60.65 billion. The Russian invasion in Ukraine and announcement of the following sanctions led to increased volatility and strong daily moves in all markets: Spot FX, Metals, Major Equity Indices and Commodities. The highest daily trading volume and highest number of trades were recorded on 24th February, with a record \$127 billion transacted and more than 2.9 million trades processed. The total number of transactions for the month were 34.32 million which is an over 19.2 % YoY increase compared to last year's 28.79 million trades and 5.68% MoM increase vs January.
- London (LD4) was the busiest data centre with a total of \$950 billion transacted (78% of all registered volumes). Tokyo (TY3) comes second with \$136 bln, followed by New York (NY4) with \$124 bln. Companies continue to expand their business in Singapore (SG1) where MoM growth more than doubled reaching \$3.02 bln.
