Institutional Trading Platform

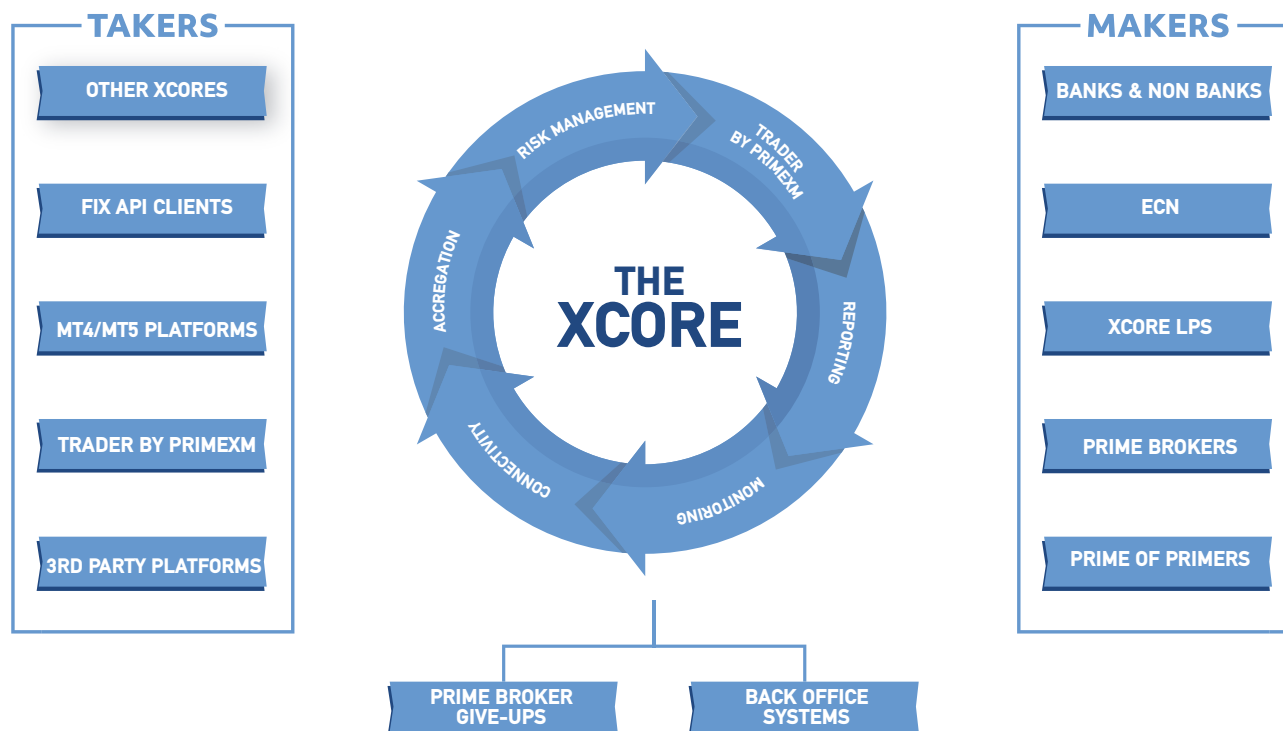

XCORE

A MASTERPIECE REVOLUTIONISING THE GLOBAL FINANCE INDUSTRY

Join the unique community of world class financial institutions, liquidity providers and prime brokers built around our innovative industry leading trading engine powered by our bespoke infrastructure.

The XCore allows clients to offer the highest and most secure trading experience in the market and join a community of unlimited connectivity solutions.

At the heart of PrimeXM's technology is the **XCore**, an ultra-low latency, multi-dimensional order management system.

AGGREGATION & EXECUTION

The powerful aggregation engine allows users to define and customise an unlimited number of liquidity pools, with microseconds execution to Tier-1 banks and non-banks.

CONNECTIVITY

XCore facilitates Plug & Play Connectivity to Tier-1 banks, Prime Brokers, ECNs, exchanges and the XCore community liquidity sources available at microsecond speeds.

RISK MANAGEMENT

Limit exposure during volatile market events and switch between a-book and b-book execution seamlessly with XCore risk management solution. Users can strengthen their control with additional customisable settings.

DRE

REPORTING

XCore's integrated and intuitive reporting module provides customised reports and extensive analysis allowing real-time insight into every aspect of the trading environment

MONITORING

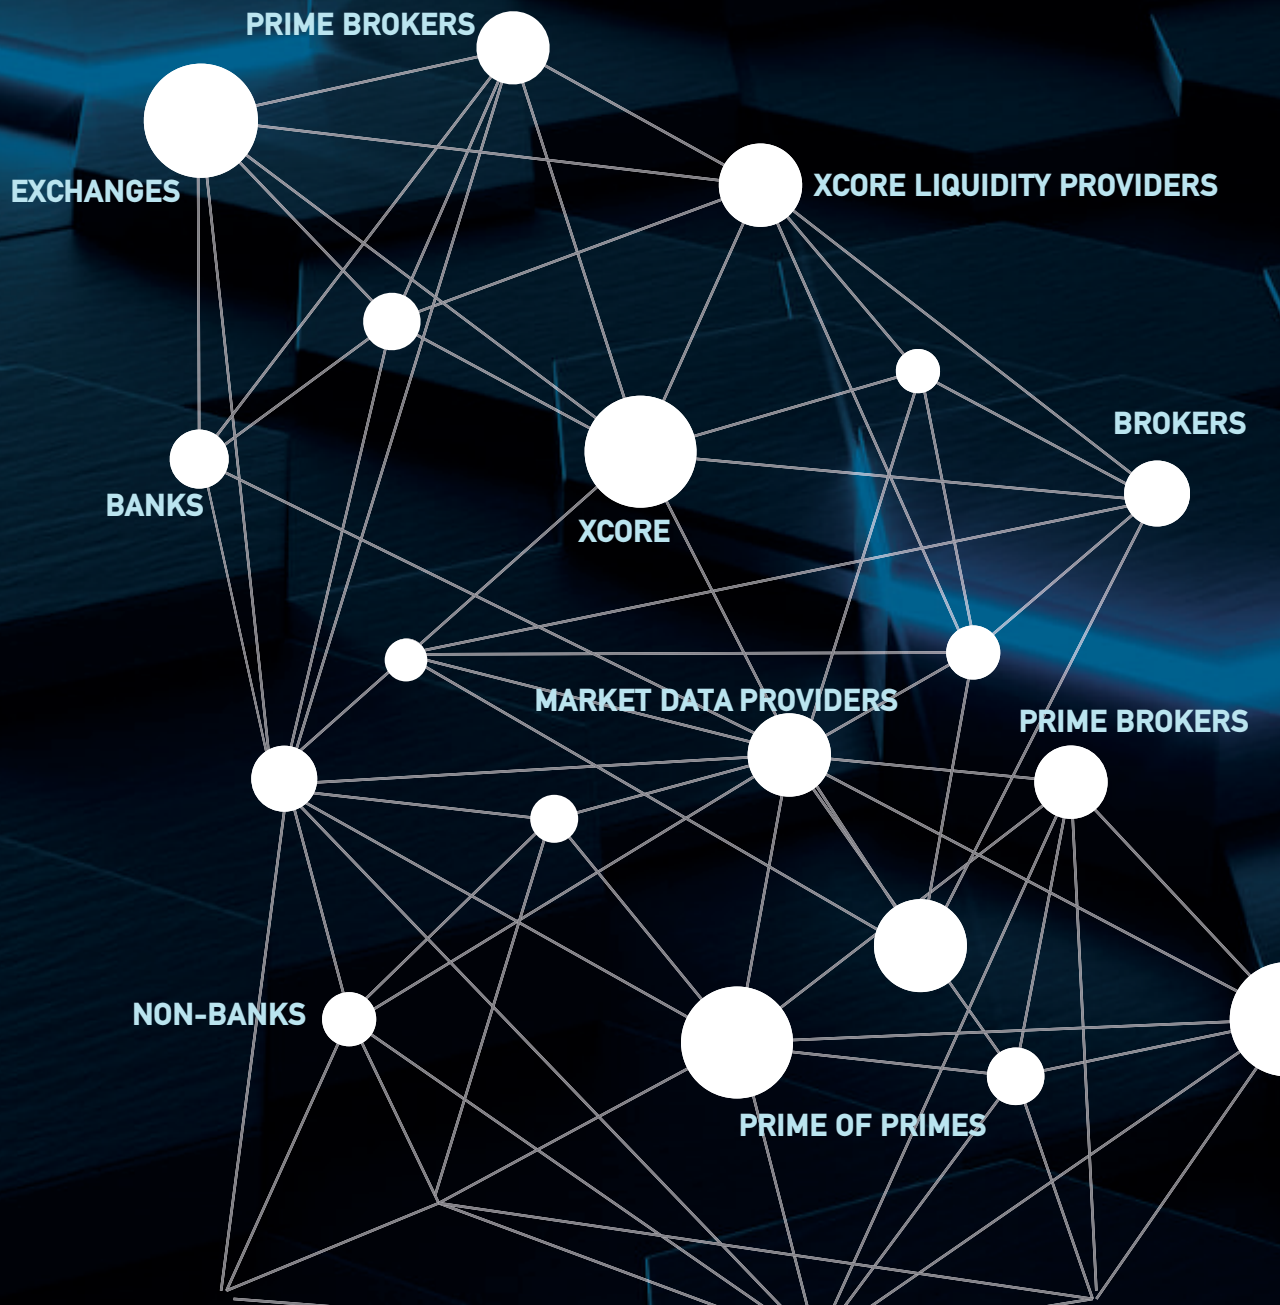

Track real-time trading and pricing activity, access historic trading data and have control over all aspects of the execution through XCore's plenitude of dashboards and log viewing tools.

EXCHANGE TRADED MARKET DATA

PrimeXM has integrated directly to CBOE for US and EU market data packages, ICE Data Service and a number of other market data providers are already supported.

XCORE

Community

XCore's growing community of 250+ partners facilitates the efficient and cost-effective exchange of liquidity between its participants. This helps develop both retail offerings, and hence brings increasing added value to the members of the PrimeXM XCore community.

HOSTING

99.999% UPTIME GUARANTEE

PrimeXM's hosting solution gives you access to Equinix hubs in financial capitals all over the world. Our servers are hosted in some of the most secure data centres, within the same suites as the pricing engines of the world's largest banks. By being physically connected to tier-1 banks, ECN's, exchanges and prime brokers through private fibre-optic connections, we guarantee a secure, ultra-low latency execution and a 99.999% uptime.

DEDICATED HOSTING

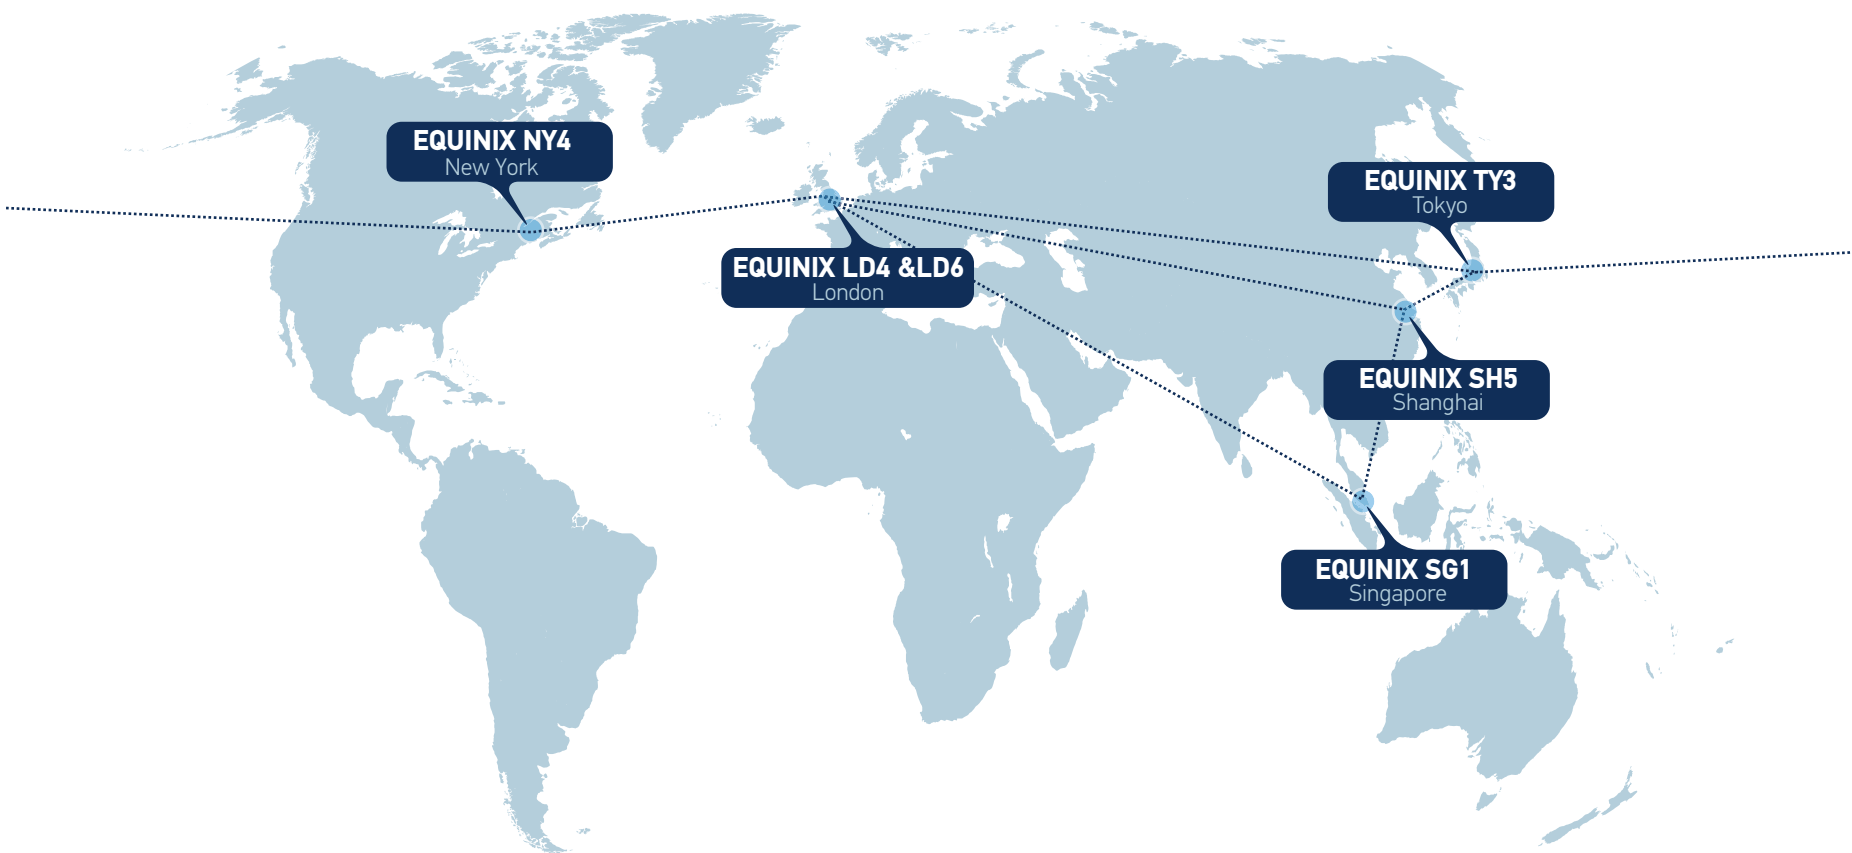

INSTITUTIONAL GRADE HOSTING SOLUTIONS

Dedicated and managed hosting solutions within world-class data centres, complemented by Tier-1 DDoS and Firewall protections, MiFID II compliant clock synchronisation and advanced monitoring and alerting system

CO-LOCATED HOSTING

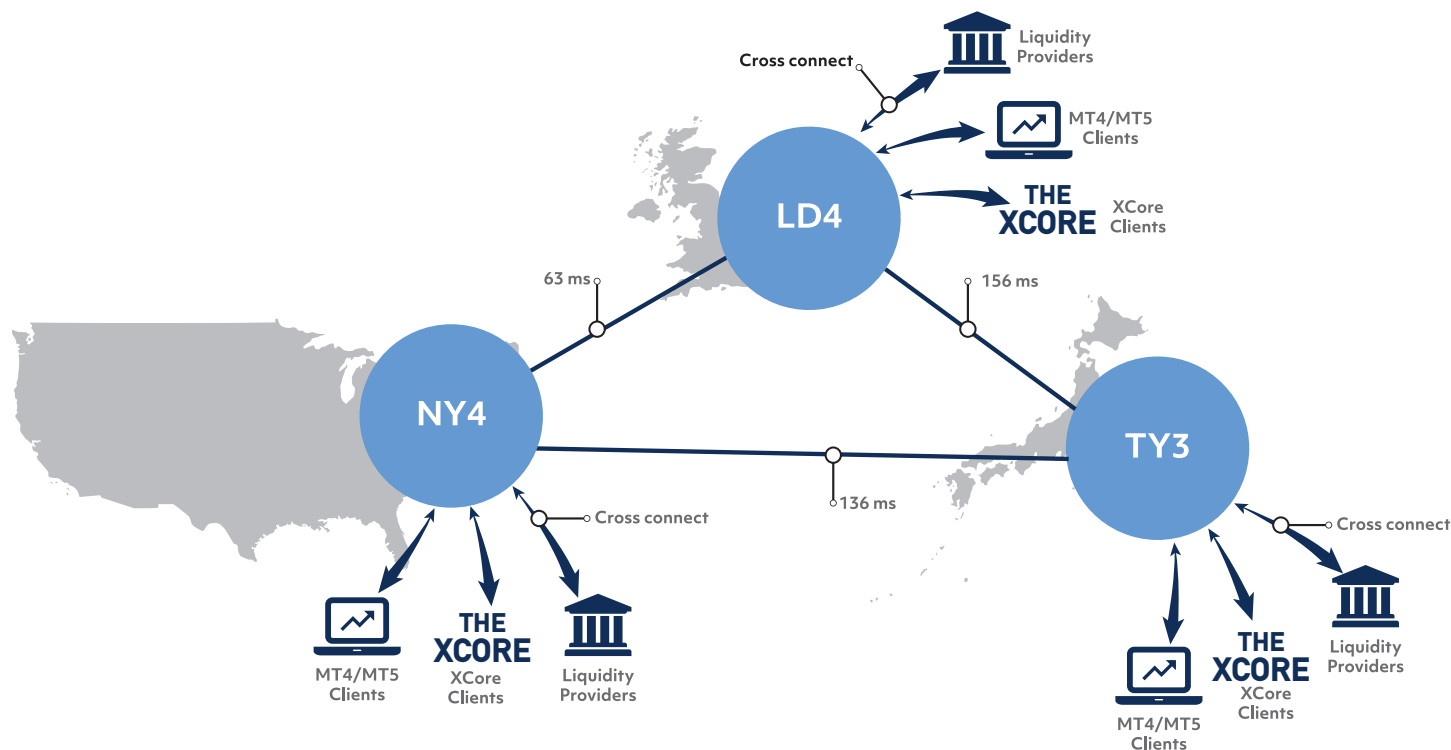

HOST YOUR SERVERS INSIDE OUR INFRASTRUCTURE

Securely house your own servers in PrimeXM's cabinets, within the e-FX low-latency suites of Equinix ISO 9001:2008, ISO 27001:2013, ISAE 3000 type II and SSAE 16 accredited data centres.

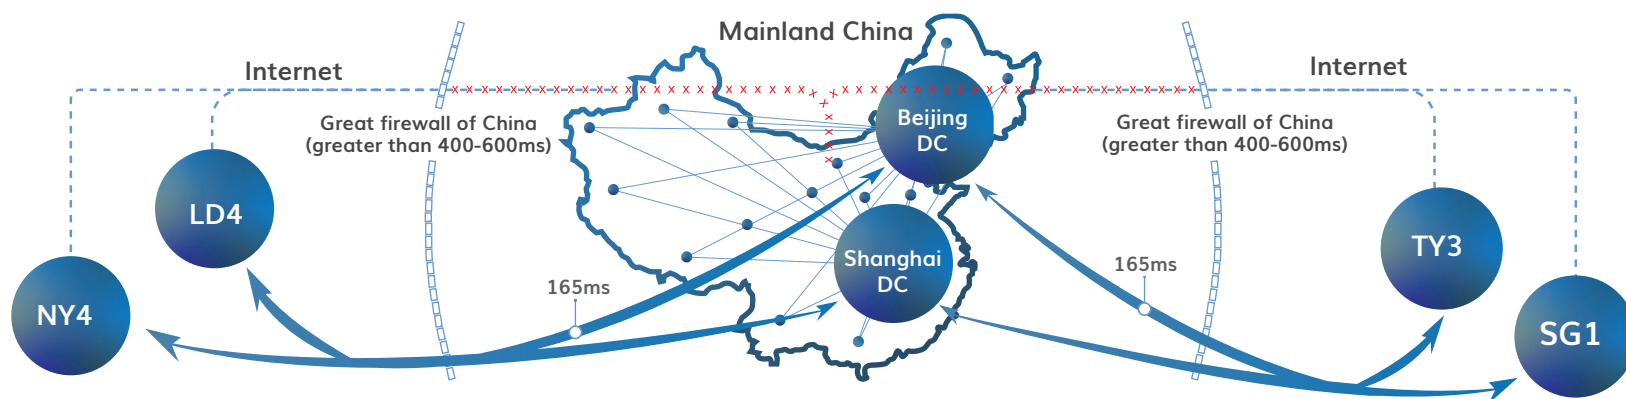

NETWORK AND SECURITY

With a presence in every major financial hub and supported by our ISP grade infrastructure, our award-winning connectivity solutions offer reliable and low latency access to the most liquid market in the industry.

Due to geographical network restrictions and congested international bandwidth, China's internet infrastructure presents a number of unique challenges that can adversely affect a high-quality trading experience and negatively impact a broker's reputation.

PrimeXM's China Connectivity Solution addresses these challenges for both MT4/MT5 as well as proprietary FIX server platforms, offering connectivity to DC in more than 20 locations in mainland China, resulting in the best possible trading experience with a truly redundant and robust connection. Using our China Connectivity Service customers can connect from the Equinix NY4, LD4, TY3 and SG1 data centres to North, Central, East and South, mainland China.

ENTERPRISE FIREWALL

PrimeXM Enterprise firewall service offers a solid layer of security around your data and plays an important role in our multi-stage defence strategy for your internal trading systems. This solution delivers a fully hosted & managed Firewall, for Brokers looking to protect their Trading servers from security breaks and DDoS attacks.

KEY FEATURES
