

May 2020 Highlights

- PrimeXM recorded a total of \$884.61 billion in monthly trading volume in May across the 3 major data center locations, which indicates the trading activities have stabilized after market volatility lessened after March.
- The Average Daily Volume (ADV) in May was \$42.12 billion compared to ADV of \$41.20 billion in April, this represents a slight 1.74% MoM increase.
- The total number of trades in May saw a 10.14% decline from April's 31.28 million to 28.11 million, taking into consideration the major bank holidays in the UK and US on the last Monday of May.
- 75% of all trading volume was registered in our Data Center located in London LD4, NY4 remains in the second place with \$7.7 billion in ADV showing continuous growth from beginning of 2020.
- The most-traded instrument in May was US DJIA index (#US30) with \$146.56 billion and demand in XAUUSD has returned as Gold price has climbed to all time high since late 2012.
